WORK EXPERIENCE

Backend Developer (Part-Time) Remote
Uppdrott | Copenhagen, Denmark

Aug 2023 - Jan 2024

- Developed and maintained RESTful APIs with Node.js while optimizing database queries in Firebase and MongoDB.
- Built and deployed containerized applications using Docker and automated CI/CD pipelines.
- Collaborated with frontend teams using React Native to deliver seamless mobile application functionalities.
- Actively participated in Agile processes including sprint planning and daily stand-ups to ensure timely delivery and quality.

Full Stack Developer & Technical Product Consultant Remote
Initium Solutions | Giza, Egypt

Aug 2022 - Jul 2023

- Collaborated on diverse, large-scale projects across sectors such as banking systems, e-commerce platforms, and corporate portals, providing end-to-end development solutions.
- Engineered robust web applications using technologies including React, HTML5, CSS, Node.js, JavaScript, Python, and Java to ensure high performance and scalability.
- Designed and implemented efficient data management systems by integrating databases such as MySQL, MongoDB, and Oracle.
- Customized and optimized Bitrix24 Cloud services with JavaScript, jQuery, and the Bitrix API to improve system usability and streamline processes.
- Developed technical product insights and implemented innovative solutions that enhanced operational efficiency and supported successful go-to-market strategies.

Product Manager Hybrid
ECS Distribution | Giza, Egypt

Aug 2019 - Jul 2022

- Aligned product strategies with corporate objectives by conducting market research to identify customer needs and emerging trends.
- Developed comprehensive roadmaps, feature sets, and marketing plans while managing both user and technical documentation.
- Collaborated with cross-functional teams to deliver products on schedule and support sales and marketing efforts.
- Monitored industry trends, enhanced customer satisfaction, and created competitive, data-driven solutions.
- Designed and implemented automation projects, including sales analytics applications, an online shop, and process-optimizing scripts.

EDUCATION

Dual Studies (Bachelor in Computer Science)

Sep 2015 - Jul 2019

- MSA University | University of Greenwich
Bachelor degree recognized with a ZAB certificate evaluation
-

PROJECTS

- Developed a desktop application for analyzing and processing large numerical datasets from Excel for ECS Distribution.
 - Built an online shop from scratch to drive digital sales and enhance customer engagement.
 - Designed a corporate website to effectively present organizational information and brand identity.
 - Created a web-scraping script to efficiently manage and compare pricing data.
 - Contributed to the development of deep learning-based systems for leukemia and malaria detection.
 - Developed "PetFinder" – a project utilizing Transformers to run a pet popularity contest.
-
