WORK EXPERIENCE

Full Stack Developer (Self-Employed/Freelancing)
Passau Germany

Feb 2024 - Current

- Working on freelance projects and self-initiated web applications, focusing on full-stack development, UI/UX, and deployment. Used modern tools and workflows to build scalable, maintainable apps.

Backend Developer (Part-Time) Remote
Updropp | Copenhagen, Denmark

Aug 2023 - Jan 2024

- Developed and maintained RESTful APIs with Node.js while optimizing database queries in Firebase and MongoDB.
- Built and deployed containerized applications using Docker and automated CI/CD pipelines.
- Collaborated with frontend teams using React Native to deliver seamless mobile application functionalities.
- Actively participated in Agile processes including sprint planning and daily stand-ups to ensure timely delivery and quality.

Full Stack Developer & Technical Product Consultant Remote
Initium Solutions | Giza, Egypt

Aug 2022 - Jul 2023

- Collaborated on large-scale projects in banking, e-commerce, and corporate platforms, delivering full-stack solutions.
- Built scalable web applications using React, Node.js, JavaScript, Python, and Java.
- Integrated MySQL, MongoDB, and Oracle databases for efficient data management.
- Customized Bitrix24 Cloud services using JavaScript, jQuery, and the Bitrix API to enhance usability.
- Delivered technical insights and innovative solutions to improve operational efficiency and support go-to-market strategies.

Product Manager Hybrid
ECS Distribution | Giza, Egypt

Aug 2019 - Jul 2022

- Aligned product strategies with business goals through market research and trend analysis.
- Created roadmaps, feature plans, and documentation to guide product development.
- Worked with cross-functional teams to launch products and support marketing efforts.
- Designed automation tools, including sales analytics apps, e-commerce features, and process scripts.
- Enhanced customer satisfaction with competitive, data-driven solutions.

EDUCATION

Volkshochschule

Aug 2024 - May 2025

- Completed German language studies from A1 to B2 level

Dual Studies (Bachelor in Computer Science)

Sep 2015 - Jul 2019

MSA University | University of Greenwich

- Bachelor degree recognized with ZAB certificate evaluation.
 - 4 Years with 210 ECTS (according to German system).
-

PROJECTS

- Built AI Interviews, a Next.js platform using TailwindCSS and Gemini/GPT-4o for realistic, voice-based job interview practice. [LINK](#)
 - Developed a scalable University Library Management System with Next.js, and PostgreSQL, including public and admin panels for book lending and user management. [LINK](#)
 - AI Trips – AI-powered travel platform with smart itinerary generation, trip booking, admin dashboard, and real-time analytics in a secure, scalable design. [LINK](#)
 - Developed a desktop application for analyzing and processing large numerical datasets from Excel for ECS Distribution. [LINK](#)
 - Created a web-scraping script to efficiently manage and compare pricing data. [LINK](#)
 - Contributed to the development of deep learning-based systems for leukemia and malaria detection. [LINK](#)
 - Developed “PetFinder” – a project utilizing Transformers to run a pet popularity contest. [LINK](#)
-
